

# Sharing your information to give you better health and social care

**Local health and social care services are working together to improve how your information is shared to support the decisions they make about your care.**

If you are being seen by more than one health or care service, the professionals treating you will now be able to share summary information if you give permission, such as recent appointments, test results and the medicines you are on.

If you want to know more, pick up the leaflet, telephone **01244 362741** or visit:
